PROFESSIONAL RANGE PRODUCT INFORMATION

Glycolic Acid Peels

By removing damaged cells from the skin's surface, glycolic acid also stimulates collagen production and speeds up the natural skin renewal process.

Glycolic acid preparations are recommended for those whose skin is showing signs of ageing. Fine lines, brown marks and solar keratoses can improve with regular applications or peels. Glycolic acid may also prove helpful for those prone to acne.

Mild 15% Glycolic Peel - Perfect for sensitive skin

Medium 20% Glycolic Peel - Perfect for multiple skin types (Not sensitive)

Strong 30% Glycolic Peel - Perfect for tough skin and those who have used peels previously.

Directions: Apply peel solution to clean skin using gauze or cotton pad. Leave on the skin for 5-20 minutes depending on skin types and then remove thoroughly with water.

*neutralising not required. *crystallisation may occur on the skin.

Lactic Acid Peels

Lactic acid is specifically used to treat hyperpigmentation, age spots, and other factors that contribute to a dull and uneven complexion. Other benefits of AHAs like lactic acid include improved skin tone and reduced pore appearance. It is also a great choice if you wish to ensure the skin maintains its moisture.

Mild 15% Lactic Peel - Perfect for sensitive skin

Medium 20% Lactic Peel - Perfect for multiple skin types- For a slightly stronger peel.

Strong 30% Lactic Peel - Perfect for tough skin and those who have used peels previously.

Directions: Apply peel solution to clean skin using gauze or cotton pad. Leave on the skin for 5-20 minutes depending on skin types and then remove thoroughly with water.

*neutralising not required. *crystallisation may occur on the skin.

Salicylic Acid Peels

Salicylic Acid peels are particularly helpful in clearing clogged follicles and in promoting exfoliation. They are primarily used for acne, but can also be used to fade age or discoloured spots.

Mild 15% Salicylic Peel - Perfect for sensitive skin

Medium 20% Salicylic Peel - Perfect for multiple skin types- For a slightly stronger peel.

Strong 30% Salicylic Peel - Perfect for tough skin and those who have used peels previously.

Directions: Apply peel solution to clean skin using gauze or cotton pad. Leave on the skin for 5-20 minutes depending on skin types and then remove thoroughly with water.

*neutralising not required. *crystallisation may occur on the skin.

ACPHARM

Private Label Skincare

Increase your skin's elasticity, remove dull and dead skin, and give your skin a healthy and youthful glow, even out your complexion and reduce dark marks.

Directions: Apply peel solution to clean skin using gauze or cotton pad. Leave on the skin for 5-20 minutes depending on skin types and then remove thoroughly with water. *neutralising not required. *crystallisation may occur on the skin.

Papaya Enzyme Mask

Salicylic acid, Papaya & Pineapple enzymes, rosehip oil & sea buckthorn oil

Exfoliate and purify tired, lacklustre skin with this non-abrasive cream exfoliator. Natural fruit enzymes of exfoliating papaya and calming pineapple smooth and clarify the complexion. The addition of Rosehip and Sea Buckthorn oils leave the skin feeling refreshed and nourished.

Directions: Apply a thin layer to face, avoiding eye area and leave on for 10-20 minutes depending on skin types. Remove thoroughly with water *neutralising not required

AHA/BHA Mask/Paste

Glycolic acid 11.5%, lactic acid 3.8%, salicylic acid 0.7%

This is an AHA/BHA Peel containing a blend of Glycolic, Lactic and Salicylic Acid to soften and dissolve the dead skin cells, reduce pore obstruction, draw out impurities from the skin, assist with skin hydration and aids in healing and soothing of the skin. Beneficial for acne, congested, sun damaged and aged skin. This exfoliation treatment will leave your skin feeling soft, smooth and hydrated.

Directions: Apply a thin layer to the entire face and décolletage using a brush, avoiding eye area. Leave on for 5-15 minutes depending on skin type or until mask has dried. Remove thoroughly with water. *neutralising not required

Lightening/Brightening Skin Mask

Glycolic acid 8%, lactic acid 2.5%, salicylic acid 0.4%, Niacinamide 5%, Kojic acid 1.7%

Similar to the AHA/BHA Mask, this lightening & brightening Skin Mask will help reduce the appearance of sun/age spots and reduce the appearance of pigmentation. Containing Niacinamide in a high strength as well as Kojic Acid, this mask leaves the skin looking brighter and feeling nourished and firm.

Directions: Apply a thin layer to the entire face and décolletage using a brush, avoiding eye area. Leave on for 5-15 minutes depending on skin type or until mask has dried. Remove thoroughly with water. *neutralising not required

Proluronic Serum

Hyaluronic acid, Vitamin b3 & vitamin b5

This B5 B3 serum is enriched with vitamin B3 (Niacinimide) and B5, known to help with tissue repair, it replenishes nutrients the skin needs to feel smooth and appear younger. This moisture-enhancing gel contains hyaluronic acid, the body's natural hydrator, to bind moisture to the skin.

Directions: Apply generously to entire face and décolletage as a pre, post or during serum. Great for skin needling and as a post skin treatment mask.

ACPHARM

Melasma Cream w/ tranexamic acid

Our melasma cream contains similar ingredients to our Short/Long term depigmentation creams with the added ingredients of Tranexamic Acid. It is mainly used for patients that have tried multiple options to reduce melasma without prior success.

Melasma Cream

Our melasma cream contains similar ingredients to our Short/Long term depigmentation creams. This formula is used as a first line treatment for Melasma to reduce pigmentation that is stubborn.

Kligman's Ointment

Hydroquinone 2%, Tretinoin 0.5%, Memetasone 1%

The Kligman formula is a pomade with a hydroquinone base, retinoic acid and corticosteroid. It is used for treating a number of very tenacious hyperpigmentation illnesses. Great for pigmentation due to acne, eczema or contact allergy)

Trichloroacetic Acid (TCA)

Trichloroacetic acid can make marked improvements in blotchy pigmentation, freckling, sun damage, fine wrinkles, and some types of acne scars. It consists of the application of one or several layers of medication to your skin to create a controlled chemical burn. During the next several days, the skin turns darker, feels tight, then cracks and peels off, leaving a new fresh layer of skin.
